## About Me

Aspiring developer with a strong enthusiasm for building efficient web applications. Eager to learn and grow in a dynamic environment, I am seeking an entry-level position where I can apply my skills in server-side development, database management, and front-end technologies while continuously expanding my knowledge in both backend and frontend development.

## Education

**Bachelor of Science in Information Technology**

University of Mindanao Tagum Campus  
2021 - 2025

## Skills

- HTML
- CSS
- Bootstrap
- JavaScript
- PHP
- MySQL
- Front-End Development
- Responsive Web Design

## Project Experience

### UM RESEARCH PORTAL

- A comprehensive website that can manage, track, and store research titles efficiently, allowing users to categorize their work, collaborate with peers, and access a searchable database for easy retrieval and organization of their research projects.

### E-BRGY: BARANGAY GOVERNANCE MANAGEMENT SYSTEM

- The E-BRGY: Barangay Governance Management System is a digital platform designed to modernize barangay administration in the Philippines by automating processes, enhancing transparency, and fostering community engagement through features like centralized databases, online service requests, and appointment scheduling.

### BTS: BUDGET TRACKING SYSTEM APP

- The Budget Tracker App helps users effortlessly monitor and manage their spending by categorizing expenses, setting budgets, and providing insightful reports for better financial control.
